BPC BROS POWDER COATINGS

ABOUT BROS

BROS COATINGS 는 분체 도료 업계에서 GREEN 브랜드임을 자랑스럽게 생각합니다. 인간의 건강을 보호하는 책임감을 가지고 있습니다. 환경과 리더십 팀인 BROS 과학자들은 유해 물질, 오염 물질을 포함하지 않는 원산지 재료로부터 안전하고 친근하며 RoHS 준수 제품을 만드는 데 앞장 섰습니다. 우리는 지속 가능한 녹색 산업의 발전 추세에 크게 기여합니다.

BROS COATINGS is proud to be the GREEN brand in the powder coating industry. With a sense of responsibility to protect human health. The environment plus the leadership team, BROS Scientists pioneered the creation of safe, friendly, RoHS-compliant products from originating materials, which do not contain harmful substances, pollutants,... We contribute significantly to the development trend sustainable GREEN industry.

INSTRUCTIONS

- 1) Actual coated color can be varied depending on coating conditions.
(Curing temperature, energy source type of dry-off oven, substrates type and more)
실제 코팅 색상은 코팅 조건에 따라 다를 수 있습니다.
(경화 온도, Dry-off Oven 의 에너지원 유형, 기질 유형 등)
- 2) Please note that metallic colors (Silver, copper, gold and more) are sensitive to moisture and chemicals. Transparent top coating is recommended after initial metallic coating.
금속성 색상(은, 구리, 금 등)은 습기와 화학물질에 민감하므로 주의하십시오.
초기 금속 코팅 후 투명 상도 코팅을 권장합니다.
- 3) Epoxy and epoxy/polyester types are not recommended for outdoor use due to weak light resistance.
Epoxy 및 Epoxy/Polyester 계열은 내광성이 약하므로 옥외용으로 사용을 권장하지 않습니다.
- 4) Unlike new powder coatings, recycled ones do not have any normal-sized particle distribution and electrostatic properties. Therefore, recommended mixing ratio between new and recycled powder is 4:1.
Reusing recycled metallic blended powder is not recommended due to the color difference caused by varied metallic distribution.
새로운 분체도료와 달리 재활용된 분체도료는 정상적인 크기의 입도분포가 없고 정전기 속성. 따라서 새 분말과 재생 분말의 권장 혼합 비율은 4:1.
입니다 재활용 메탈릭 블렌드 파우더는 색상 차이로 인해 재사용을 권장하지 않습니다 다양한 금속 분포로.
- 5) Special patterns and metallic powder coatings can be different in color or pattern depending on dry film thickness, curing condition, pre-treatment condition of substrate, the mixing ratio of recycled powder coatings, powder gun types, and voltage difference.
특수패턴 및 금속분체도료는 건조도막두께, 경화조건, 기재의 전처리조건, 재생분체도료의 혼합비율, 분말건의 종류, 전압차에 따라 색상이나 패턴이 다를 수 있습니다.
- 6) Please refer to the data sheet and instructions before the actual coating.
실제 코팅 전에 데이터 시트 및 지침을 참조하십시오.
- 7) Heavy metal-free types with yellow, orange, and red colors can be customized.
노란색, 주황색, 빨간색의 중금속이 없는 유형은 사용자 정의할 수 있습니다.
- 8) Polyester TGIC free type can be customized.
Polyester TGIC free type 은 주문제작 가능합니다
- 9) Please follow recommended curing temperature condition for satin and matt type to avoid gloss or color difference.
광택 및 색상 차이를 방지하기 위해 Satin 및 Matte 유형의 권장 경화 온도 조건을 준수하십시오.
- 10) For additional inquiries, please refer to customer care at + 84 908 391189.
기타 문의사항은 고객센터 + 84 908 391189로 문의 부탁드립니다.
